

Water Bath

Descriptions

Indeed, a water bath controller is a vital instrument in scientific, industrial, and laboratory settings. It plays a crucial role in ensuring precise temperature control within water baths or reservoirs, facilitating optimal conditions for experiments, processes, and other applications that demand specific and stable temperatures.

Features

- Micro-controller based design.
- Incorporated 7 Nos of 7-segment display.
- Temperature resolution 0.1°C.
- Sensor Type PT100.
- Implement automatic process control with robust algorithm.
- Audio-visual alarms in temperature variations.
- Alarm Mute options.
- Integrate optional relay for heater / valve control.
- Low Water detections and its alarm.
- Temperature calibration through the software by offset data setting.
- Auto-calibration of temperature.
- LED indications for system process
